

Aymen Ben Salah

Junior Full Stack Developer | MERN / Next.js | Django basics

Tunis, Tunisia | +216 55 123 456 | aymen.bensalah.test@example.com | LinkedIn: linkedin.com/in/aymen-bensalah-test | GitHub: github.com/aymen-bensalah-test | Portfolio: aymen-dev.example.com

PROFESSIONAL SUMMARY

Junior full stack developer with hands-on experience building web applications using JavaScript, React, Next.js, Node.js, Express, MongoDB, PostgreSQL, HTML, CSS, Tailwind CSS, REST APIs, and Git. Interested in internship and junior software roles in France, Belgium, Luxembourg, Canada, or remote-first teams. Comfortable working with Agile rituals, debugging production-like issues, writing basic unit tests, and documenting technical decisions.

TECHNICAL SKILLS

Frontend	JavaScript, TypeScript basics, React, Next.js, HTML5, CSS3, Tailwind CSS, HTMX basics, responsive UI
Backend	Node.js, Express.js, REST API design, Django basics, authentication flows, validation, error handling
Databases	MongoDB, PostgreSQL, SQL basics, Mongoose, Prisma basics, indexing fundamentals
Tools	Git, GitHub, Docker basics, Linux/Fedora, VS Code, Postman, npm, pnpm, CI basics
Testing	Jest basics, React Testing Library basics, API smoke tests, manual QA, bug reports

PROFESSIONAL EXPERIENCE

Junior Web Developer Intern - DigitalBridge Labs, Tunis

March 2025 - August 2025

- Built reusable React components for an internal CRM dashboard and improved mobile responsiveness across 12 screens.
- Created Express.js REST endpoints for customer records, pagination, search filters, and role-based access control.
- Integrated MongoDB aggregation queries to generate weekly operational statistics for team leads.
- Wrote Postman collections and basic Jest tests for API routes covering authentication, validation, and error cases.

Freelance Web Developer - Local Clients

September 2024 - February 2025

- Delivered a Next.js landing page for a small training center with contact form, SEO metadata, and analytics events.
- Implemented a simple booking module with PostgreSQL, Prisma, server-side validation, and admin export to CSV.
- Prepared technical documentation so non-technical users could manage content and troubleshoot common issues.

PROJECTS

JobMatch Tunisia - Job Matching Web App

Next.js, Node.js, Express, PostgreSQL, Tailwind CSS, JWT

- Built a prototype that compares candidate skills with job descriptions and returns match percentage, missing skills, and recommended learning topics.
- Designed normalized tables for candidates, job posts, skills, applications, and saved searches.
- Added filters by location, contract type, seniority, remote availability, salary range, and technology stack.

Inventory Manager API

Node.js, Express, MongoDB, Mongoose, Jest, Docker

- Created CRUD endpoints for products, suppliers, stock movements, and low-stock alerts.
- Implemented input validation, centralized error handling, and API documentation with sample requests.

EDUCATION

Licence en Informatique - Software Engineering Track, Private University of Tunis

2022 - 2025 | Relevant coursework: algorithms, databases, web development, software engineering, networks, cloud basics

Baccalaureate in Computer Science - Tunis, Tunisia

2019

CERTIFICATIONS

- GoMyCode Full Stack JavaScript Bootcamp - MERN Stack - 2024
- freeCodeCamp Responsive Web Design - 2024
- DataCamp Intermediate SQL - 2025

LANGUAGES

Arabic: Native | French: Professional working proficiency | English: Professional working proficiency

TARGET ROLES

Junior Full Stack Developer, Frontend Developer, Backend Developer, Web Developer Intern, Software Developer Intern, React Developer, Node.js Developer

PARSER TEST NOTES

Synthetic test document. Contact details and links are fictional. Designed to test CV parsing, skill extraction, seniority detection, location extraction, language extraction, project parsing, and job matching logic.
